We're here to create a long-lasting infection in the financial world, powered by a growing restaurant empire. Your support will help us go viral-and maybe even reach your favorite fast-food joint soon.

Bon appétit, and happy hodling!

PAINDEMIECOIN TOKEN UTILITY

PAINDEMIE Coin runs on the Solana blockchain. Customers of PAINDEMIE can receive exclusive discounts by holding a certain value of \$PDM tokens in Dollars and presenting them at checkout. With a tiered system, you can get a 5% discount starting at just \$50 worth of \$PDM, increasing up to 20% for \$500 worth of tokens.

This program not only offers potential financial benefits but also fosters a close-knit community of dedicated fans. PAINDEMIE welcomes approximately 30,000 visitors annually and has ambitious plans for global expansion and franchise models. More applications and integrations are on the way!

IMMUNITY PROTOCOLS

We're all about transparency, honesty, and a dash of heat. Here's how we're keeping things clean and spicy:

- ✓ **\$25k Burned:** To keep \$PDM rare, we torched sixteen million tokens (don't worry, it's the good kind of burn).
- ✓ **Locked Liquidity:** We've burned the liquidity pool, locking it away tighter than the secret sauce recipe.
- ✓ **Supply Lockdown:** 30% of our total supply is quarantined for a year, with more juicy details coming soon.
- ✓ **Marketing & Development Fund:** 10% of tokens will fuel ads, promos, and partnerships to help spread the word.
- ✓ **Team Reserves:** 5% is set aside for the devs - the frontline heroes of this project.
